PREFACE

I am pleased to present the Pennsylvania Bureau of Correction's 1983 Annual Statistical Report. This report provides pertinent information concerning the size and characteristics of the inmate population.

During 1983, the Bureau of Correction experienced an 11.6 percent growth in inmate population with a year end figure of 11,798. At the close of 1983, 3,856 inmates were double celled. As of April 30, 1984 the population increased to 12,225 with 4,348 inmates double celled.

During the past 3 years inmate population has increased by 43%. This growth, which is part of national phenomenon, has severely strained the resources and capacities of our institutions. The next few years will be a time of challenge for the Bureau of Correction as we are forced to accommodate even larger populations.

Respectfully submitted,

Glen R. Jeffes

Glen R. Jeffes
Commissioner

INTRODUCTION

This report presents a descriptive, statistical summary of the inmates confined within the Pennsylvania Bureau of Correction for the calendar year 1983.

The data provided in the Pennsylvania Bureau of Correction's 1983 Annual Statistical Report are for the most part self-explanatory. A summary narrative has been provided to quickly identify major points of interest.

Legislative Mandate

The Pennsylvania Bureau of Correction was established by Sections 911, 912, 913, 914, 914.1, 915 and 916 of the Act of April 9, 1929 (P.L. 177, No. 175). The Bureau of Correction is currently an administrative agency of the Office of the General Counsel (Act of October 15, 1980; P.L. 950, No. 164).

Administrative Responsibility

The Bureau of Correction operates seven state correctional institutions, two state regional correctional facilities, sixteen community service centers, an inmate population in excess of 12,000 and a staff in excess of 3,300.

Definitions

1. Capacity - This term identifies the number of inmates which a specific housing area is designed to hold. Since all cells in the Bureau of Correction are designed to hold one inmate, their capacity is considered to be one even though many cells are now holding two inmates. Similarity modular units and dormitory areas have been filled beyond their capacity because of over population.

2. State correctional institution - These institutions represent the Bureau's major correctional facilities, located at Camp Hill, Dallas, Graterford, Huntingdon, Muncy, Pittsburgh and Rockview. The State Correctional Institution at Muncy is a female institution. These institutions receive offenders with a maximum sentence of 2 years or more.

3. State regional correctional facility - These are specialized facilities in two of the Commonwealth's six "Common Human Service Regions" which usually receive inmates sentenced from six months to two years. The two regional correctional facilities are located at Greensburg and Mercer.

4. Community service centers - The Bureau of Correction provides residential facilities for adult offenders as a transitional step between release from a state institution and return to independent living within the community. The centers provide custodial structure and a strong emphasis on guidance and counseling. This program provides selected offenders a continuum of the rehabilitative process by the state and regional correctional facilities. The centers further serve as an essential reintegration phase for community return. The Bureau of Correction currently operates sixteen (16) such centers; two of which are exclusively for female offenders.

5. Group homes - Private or publicly owned facilities who offer specialized rehabilitative treatment modalities for qualified resident inmates of the Bureau of Correction's Community Services Division. These facilities compliment the Community Service Center residency program and must provide twenty-four (24) hour supervision, living quarters and specialized services that aid in the transition and reintegration of the resident into the community.

6. Specified population movements - Generally, most admission and release movements used in this report are self-explanatory. To aid the reader of this report, certain movements are further defined as follows:

   a. Authorized temporary absences - Court authorized appearances for inmate writs, hearings, funerals, etc. Always under jurisdiction of the local court.

   b. Bureau transfers - generally referred to as 'intrasystem' transfers between state correctional institutions, state regional correctional facilities, community service centers, and group homes under the jurisdiction of the Bureau of Correction. Includes all permanent and temporary transfers within the Bureau of Correction.

   c. Detained by other authorities - Generally represents Bureau of Correction inmates who were arrested while on furlough or captured while on escape status and are facing new charges, or serving another sentence in another jurisdiction, or are suspects in a crime and are being elsewhere pending transfer back to the Bureau of Correction.

d. Detentioners - Inmates awaiting trial or sentencing after a trial, but in all cases without a sentence transferred from a county prison and detained in the Bureau of Correction for medical or security reasons.

e. Furlough - Inmates are released on furlough for purpose of family visits, job applications, and pre-release planning. Inmates on furlough are not supervised but are still under the jurisdiction of the Bureau of Correction.

f. Interstate compact - Inmates transferred to the Bureau of Correction to serve time due another state under the Interstate Compact for Corrections (ICC) or an inmate under the ICC returning to the state which the time is being served.

g. Intersystem transfers - Includes transfers between state correctional facilities (regionals included) and county prisons, state and local mental hospitals, and other state and jurisdictions.

h. Miscellaneous - Generally includes inmates released to and received from authorities for various reasons, and administrative releases to adjust and or correct inmate population counts.

i. Weekenders - Inmates committed to service time only on weekends or when not working. At the present time, weekend sentences are only served at the Greensburg State Regional Correctional Facility.

NARRATIVE SUMMARY

Inmate Populations

For the third straight year Pennsylvania experienced significant growth in inmate population and was double celling 3,856 inmates at the close of 1983.

During 1983, the population in the Bureau of Correction increased by 1,226 inmates or 11.6% from 10,572 to 11,798. This represents an average increase of 102 inmates per month.

Some major characteristics of the Bureau's inmate population on December 31, 1983 are described below:

1. 44.6% are white.
2. 96.6% are males.
3. 27% are under twenty-five years of age.
4. Average age of all inmates is 30.6%.
5. 23.5% are serving time for robbery, 19.3% for murder (all types), and 18.1% for burglary.
6. Based on minimum sentence only, 27.7% are serving minimum sentences over five years.
7. Excluding regional correctional facilities, 11.2% are serving life sentences.
8. Excluding regional correctional facilities, 39.0% and 11.3% are from Philadelphia and Allegheny counties respectively.
9. There are 93.2 inmates per 100,000 civilian population.

Receptions

Five thousand, five hundred, fifty nine (5,559) inmates were received in the nine state and regional correctional facilities during 1983. Parole violators represented 25.1% of all receptions.

Nearly one-half of all court commitments represented three offenses: burglary (22.6%) robbery (18.3%), and theft (9.8%). 71.3% of all court commitments were for Crime Index Offenses.

Excluding state regional correctional facilities, 47.9% of all court commitments were white and 92.5% were males. Over one-half of these court commitments were from three counties: Philadelphia (37.2%), Allegheny (10.9%), and Montgomery (5.5%).

Releases

Including inmates released to another sentence during 1983, 4,119 inmates were paroled or reparoled by state (3,299) and local (820) paroling authorities. Another 552 inamtes were released unconditionally by expiration of maximum sentence (426) or by court order (126).

Inmates released from state correctional institutions served an average of two years, seven months and fourteen days. Inmates released from regional correctional facilities served an average of eleven months and twenty-four days.

Note: 1954 to 1975 includes juvenile court commitments; 1969 to 1983 includes community service centers and group homes.

Population figures shown on this chart differ from those found elsewhere in the Annual Statistical Report. These figures list inmates physically present in an institution or community service center. They exclude those inmates serving sentences under the Bureau's jurisdiction but temporarily absent from a housing units due to outside hospitalization, furlough or temporary housing in a county jail when awaiting a court appearance. They also exclude inmates serving weekend sentences. These "physically present" figures were used because complete population data is not available for some of the earlier years of the chart.
